## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I, claims 1-3.

Species II, claims 4 & 5.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species I.

Species II.

The following claim(s) are generic: it appears that there is no generic claim.

Art Unit: 3644

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Species I requires an aquarium-cleaning device in which the formed charcoal is provided while Species II requires an aquarium-cleaning device using as a microorganism carrier the plum seed charcoal.

4. During a telephone conversation with Attorney Neimark on 4/27/06 a provisional election was made with traverse to prosecute the invention of Species I, claimsc 1-3.

Affirmation of this election must be made by applicant in replying to this Office action.

Claims 4 and 5 have been withdrawn from further consideration by the examiner, 37

CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is noted that the apparatus limitations as claimed in claim 1 is indefinite and confusing and therefore it is not understood what is being claimed, since the structure which goes to make up the apparatus must be clearly and positively specified and must

Art Unit: 3644

be organized and correlated in such a manner as to present a complete operative apparatus. Also, the phrase "the formed charcoal" lacks antecedent basis.

***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-3, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Heschel, W., et al., "On the suitability of agricultural by-products for the manufacture of granular activated carbon" (hereinafter is referred to as Heschel).

Heschel discloses that it is old and well known in the art to use an organic substances produced in the food industries as a cleaning medium/material in an aquarium-cleaning device.

***Conclusion***
